Introduction

The report provides per capita and percentage figures reflecting selected FY91 support and activity indicators for responding public libraries. Data were compiled from the FY92 Library Incentive Grant/Municipal Equalization Grant Application and the FY92 Annual Report Information Survey forms.

With few exceptions, financial, collection, and hours open data are for the twelve month period ending June 30, 1991. Seventeen libraries reported holdings and/or circulation data for calendar year 1990. The work week and full-time equivalents (FTE) data are reported as of July 1, 1991.

The report reflects income, expenditure, holdings, circulation, work week and staffing data for 323 municipalities, 92% of those with public libraries.

For municipalities with more than one independent library receiving public funds, this report reflects the combined levels of library support and activity for all libraries within the community, except for Harwich and Northampton where one library in each community did not submit any work week or staffing data.

ARRANGEMENT OF THE REPORT

The report is arranged in three sections: Statewide and Regional Data, Municipal Tables, and the survey forms, followed by an index to the municipalities.

Section One: Statewide Data and Regional Addendum

Statewide data for selected financial and collection indicators are shown for the last six fiscal years with per capitas based on the population served by the libraries responding each year.

Section Two: Municipal Tables

Data for individual municipalities are arranged in seven population groups based on the 1988 federal population estimates. Consult the Index to determine in which population group a municipality is listed.

INDICATORS OF LIBRARY SUPPORT & ACTIVITY

In addition to 1988 population estimates, 1988 population rank, and regional system affiliation (Central, Eastern, or Western), the following library data appear in this order in the municipal tables:

Total Operating Income Per Capita
Appropriated Municipal Income Per Capita

Total Operating Expenditures Per Capita
Salary Expenditures Per Capita and as a Percent of
Total Operating Expenditures

Materials Expenditures Per Capita and as a Percent
of Total Operating Expenditures
Holdings Per Capita
Circulation Per Capita
Hours Open in the Winter and Summer
Hours in the Work Week
Full-time Equivalents of Staff

The emphasis of the report is municipal data. Therefore, we have asked that the state funds received by libraries contracting with the Board of Library Commissioners to provide regional services be omitted from the report.

The following federal and state funds have been included, where relevant, in the report if the library reported them as sources of operating income or expenditures: the Library Incentive Grant, the Municipal Equalization Grant, and the Additional Aid to Public Libraries.

Because all libraries do not have precisely the same sources of income, the Total Operating Income data are not comparable in terms of categories of income and access to the income.

The discretion with which trust and/or endowment income may be expended varies widely among libraries depending on the fund restrictions. Some funds, for example, restrict expenditures to materials on a relatively narrow topic. As a result, a library's operating income may appear inflated until selected materials complying with the fund requirements are acquired.

Print and non-print data are combined in the Holdings and Circulation indicators.

Hours Open, Winter and Summer, displays the number of hours in a typical week that the library was open to the public in FY91. Hours for branch libraries are included if they do not overlap main library hours.

Hours in the Work Week, for larger libraries, is the number of hours typically worked per week by a full-time paid staff member; that is, 35 or more. For smaller libraries where no one works 35 hours, the figure is the greatest number of hours worked in a typical week by a paid staff member. Even though it is less than 35 hours and for the purposes of this report is not considered full-time, that work week might be considered full-time by the municipality.

The full-time equivalents (FTE) reflect paid full-time and part-time staff, excluding those paid by state or federally subsidized employment programs. One FTE equals 35 paid staff hours.

LIBRARY INCENTIVE GRANT AND MUNICIPAL EQUALIZATION GRANT PROGRAM

The compilation of data for this report may not necessarily correspond to the data

used to determine compliance with the requirements of the FY92 Library Incentive Grant/Municipal Equalization Grant Program.

Section Three: Survey Form & Instructions

This section contains those parts of the survey forms and instructions where data for this report was collected.

Index

Alphabetical listing of all municipalities indicating in which population group each appears.
